

## LIST OF TOP LOCAL AND INTERNATIONAL PROJECTS

### OUR EXPERIENCE

Array of development for Telecommunication, Financial Corporation, Computer Networking, Hotel and Resort Reservation, Telephony and Call Management, Project & Program Management, Enterprise Portal Solutions and Customer Relationship Management

Here are some of the top projects of Iconnect;

### LOCAL PROJECTS

#### Design and Development of:

#### - **PLDT CORPHYPE SMS PLATFORM**

This is a web based messaging system that IConnect designed and developed for PLDT. Basically, it is also incorporated with an IP based API client application that extends the connectivity from the server side to the client side. With this available configuration, the user can be capable not only to send SMS message thru web, but they can also customize their own client application if they want to.

#### - **PAGASA RAINFALL AND FLOOD FORECASTING SYSTEM**

Rainfall and flood forecasting has evolved because of the introduction of new algorithms incorporated on newly installed systems. In this project, IConnect designed the core engine for rainfall intensity processing and flood forecasting.

#### - **DATA CENTER SYSTEMS**

IConnect designed special systems with robust security for handling hosting space for web applications, video, and email for companies.

- **MULTI-PLATFORM TELECOM GRADE FIREWALL WITH WEB SECURITY**

This is a multi-platform firewall that is truly robust. It is specifically designed to cater high web traffic with filtering. In this project, IConnect designed and developed the complete firewall system.

- **SMS APPLICATION GATEWAY**

This server application was specifically use to hook content application and assign appropriate keywords and access number. It was used for MMDA inquiry, MyCupid dating and Master Mind game for Globe and Smart Telecom. In this project, IConnect designed the complete system.

- **PAGASA WEATHER BUREAU RADAR REHABILITATION PROJECT**

IConnect in partnership with a Japanese contractor has been involved in the rehabilitation of one of the three weather radar located in Northern Luzon. In this project, IConnect designed and incorporated new systems in capturing RADAR data and subsequently transmit it over radio network.

- **BATANGAS PORT SYSTEM DEVELOPMENT PROJECT**

IConnect developed merely all systems for Batangas Port Security. These include system for CCTV, Gate Management and Network Management Systems.

- **ICONNECT WDRS- WIDE DOCUMENTATION REQUEST SYSTEM DEVELOPMENT PROJECT**

IConnect developed systems of Wide Area Documentation Services for virtually request of Government Documents nationwide such as passport application, National Statistics Office Certification etc..... nationwide

**3,000 Western Union Branches and 780 LBC Branches are currently integrated to ICONNECT MAIN SERVER- WDRS VAS-Value Added Service**

## **INTERNATIONAL PROJECTS**

### **Design and Development of :**

#### **- VIETNAM AUTOMATIC IDENTIFICATION SYSTEM (AIS)**

IConnect in partnership with a Japanese contractor has been involved in AIS Database Terminal Functions. In this project we designed the registration and edit vessel entry/departure information in AIS Database server and record vessel entry/departure information through the AIS Database Terminal.

#### **- VIETNAM MONITORING AND BILLING SYSTEM (MARINE USE)**

This Vessel Monitoring System (VMS) Installation and Activation report for the Vietnam Marine Use was also developed by Iconnect team.

#### **- SMS / CSD Based Telemetry system for Indonesia**

This is actually a project by IConnect in partnership with a Japanese contractor. On the basis that mobile network providers are becoming more and more reliable these days, the IConnect team came to realize the practicality of having data stream via CSD and alerts thru SMS. Telemetry systems are usually remotely located because their sensors for rainfall and water level that is strategically located. Telemetry systems that transmit data over mobile network turned out to be very practical in terms of its initial cost which makes this product more affordable.

#### **- JAPAN TOTAL MEDIA COMMUNICATION (Automotive Portal)**

Iconnect designed special system for automotive portal for Japan Media Communication
